

The background of the image features several large, light gray concentric circles that create a sense of depth and movement. In the center, there is a smaller set of concentric circles, with a small gray dot at their center, resembling a target or a signal. The main text is centered horizontally and partially overlaps these circular elements.

Accutech™

RFID-ENABLED SECURITY PRODUCTS

Pioneers in patient security

Founded in 1985, Innovative Control Systems, Inc. is a leading manufacturer of advanced electronic monitoring and security systems, which we market and sell under the Accutech brand. Our specialized, RFID-enabled systems are trusted by thousands of healthcare facilities around the world to ensure the safety of infants, children and long-term care residents.

All Accutech systems are manufactured in the U.S., installed and serviced by a vast network of authorized dealers, and backed by the industry's most comprehensive customer support program.

The Accutech advantage:

- More than 25 years in RFID security—we helped to build the industry, and we continue to lead it today.
- To date, our patented patient security technologies have been installed in more than 5,000 locations worldwide.
- All of our systems come with 24-hour technical support, and our extensive certified dealer network means local service anytime you need it.
- Accutech products work seamlessly with your existing systems—saving you and your staff time and resources.

Cuddles

The original nurse-friendly infant protection system

Our Cuddles infant protection system combines patented tags and bracelets with advanced RFID technology to help prevent abductions while also helping to ensure the general safety and security of infants. Easy-to-use hardware and software work seamlessly, enabling nurses to spend less time managing a “system” and more time focusing on what matters most—caring for their little patients.

System highlights:

- Mother/baby match
- Simple report generation
- Multiple-floor monitoring capability
- Unique patient-to-floor transfer
- Alarm information with complete history
- Full spectrum of upgradeable security platforms
- Option of corporate, government and GPO pricing
- Fulfillment of FCC, NFPA, NEC and UL requirements
- Free 24-hour technical support
- One-year, non-prorated warranty on all parts and services
- Free on-site training and software updates

ResidentGuard

The next generation of resident security

Our ResidentGuard resident monitoring systems give Alzheimer's, dementia and other "at-risk" residents the ability to move freely about their facilities while receiving the protection they—and their families—need. Using advanced RFID technology, the systems put staff at ease while enabling them to direct their energies toward other critical tasks.

System highlights:

- Notification of staff if residents try to leave the facility or wander into restricted areas
- Protection against elopement and loitering
- Low-interference 418 MHz frequency
- Quick resident assignment
- LED indicators on tags to show that they are active
- Reduced costs due to long-life tags that can be turned on or off as necessary
- Option of corporate, government and GPO pricing
- Fulfillment of NFPA, FCC and NEC requirements
- Free 24-hour technical support
- One-year, non-prorated warranty on all parts and services
- Free on-site training and software updates

Kidz

Protecting every patient – from toddlers to teens

Our Kidz pediatric protection systems draw on the unique capabilities of our Cuddles and ResidentGuard systems to ensure the safety and security of patients of all ages. Built on our advanced RFID technologies, Kidz helps you to guard against abduction and patient flight while providing the comfort and freedom your younger patients demand.

FacilityGuard

Affordable, scalable electronic access control

FacilityGuard is an access control solution from Accutech that can integrate existing security systems within a facility. Multiple hardware components can be added to incorporate CCTV, lighting control systems, nurse call, wander management, infant protection, HVAC controls, etc. The software interface can be configured with different options depending on the size and scope of a facilities' needs. FacilityGuard is suitable for locations with as few as two controlled doors and scalable to enterprise level applications.

Accutech Two-Way Radio & Accessories

Complimenting Our Existing Health Care Security Solutions

Accutech's two-way radio gives health care facilities an effective, low cost communication tool for staff as well as an integrated, customizable alarm notification device. This gives your facility quicker reaction times to alarms, increased staff efficiency, and redundant alert awareness.

“We use Accutech system-wide in both our infant and geriatric areas. These systems have been in place for almost ten years, and we have found that Accutech functions flawlessly.

The nursing staff loves the system.”

ben scaglione, director of security
