

“Nurse Friendly” Infant Protection Systems

FOR COMPLETE SAFETY

Providing comfort, care and safety for even your littlest patients!

“Nurse Friendly” Infant Protection System

Saves your nurses valuable time and protects your infants!

Your nurses will be able to spend more time caring for their patients and less time managing a security system. After all, they are nurses, not security guards.

The “Nurse Friendly” Infant Protection System is designed to protect your infants with state-of-the-art RFID technology.

Our full spectrum of “Nurse Friendly” upgradeable security platforms fit your budget and your facility; for today and tomorrow.

- BR 4200 - the total package, including a tamper proof system with the Soft Bracelet that alarms upon removal. Cut Band option also available.
- IS 3200 - software-enhanced, password-protected system capable of monitoring multiple floors.
- ES 2200 - the upgradeable, proven Accutech platform with perimeter protection at an affordable price.

Accutech’s Infant Protection Systems are affordable and easy to use, which gives infants complete comfort, care and safety!

Growing demand for security

Parents rely on you to keep their infants safe and secure from birth until discharge.

According to JCAHO, one of the leading reasons for infant abduction is inadequate security systems.

JCAHO reports indicate that infant abductions in hospitals have been on the rise since 2002 and 67.8% of sentinel events occur in the general hospital setting. Most expecting parents don't realize the dangers of infant abduction.

Infant abduction is enough of a concern that hospitals warn new parents of possible abduction attempts while in the hospital's care. Many hospitals teach new parents to be aware of such threats and several measures are taken to aid in prevention.

JCAHO recommends that nurses be aware of visitors to the nursery and postpartum areas. But, with staffing shortages at many hospitals, 24-hour vigilance is not possible without a reliable Infant Protection System to aid in keeping newborns safe.

Accutech's Infant Protection System can be used in the maternity ward and delivery areas of the hospital when using our Soft Bracelet; or in the pediatric unit when using our Cut Band technology.

With Accutech's Infant Protection System, you get affordable infant security solutions for complete peace of mind.

Mothers know their infants are safe and secure with Accutech's Infant Protection System.

Light weight, water-resistant tags with our Soft Bracelet ensure comfort and safety for your infants.

All tags incorporate a red pulsating light (LED) that provides a visual indication that the tag is active.

The ease-of-use and water-resistant features make the Cut Band ideal for pediatric units.

"Nurse Friendly" Infant Protection System

Soft Bracelet Benefits:

- Won't fall off after weight loss
- Lightweight and flexible
- Prevents cutting and chafing of baby's skin
- Sensitive to baby's skin
- Unique infant identification
- Self-adjusting Soft Bracelet
- Reusable, water-resistant tag
- Alarms immediately if cut or removed
- Soft polyester-blend elastic band
- Tamper-proof

Software Benefits:

- Enroll and discharge in moments
- Simple operation
- No enrollment needed for instant protection
- Easy report generation
- On-site end-user training
- Easy to use Windows-based software

System Features:

- Alarm information with complete history of activity
- Multiple floor monitoring capability
- Patient loiter, door ajar and equipment problem notification
- Soft Bracelet/tag removal notification
- Complete fire panel interfacing with magnetic door locks
- Unique "patient to floor" transfer feature
- Tag supervision
- Tamper-proof system
- Dual-conditioning door alarm monitoring
- Cut Band system also available
- Proactive alerts to help avoid Code Pink level alarms
- Patented infant tag
- Patent pending security system

Our full range of upgradeable Infant Protection Systems allow you to choose one that fits your budget and facility's needs. We offer you the option of corporate, government, and GPO pricing.

All systems meet FCC, NFPA, NEC and UL requirements and are rigorously tested for performance. You'll receive superior customer service with 24-hour support assistance.

Your system's quality is ensured with a one-year, non-prorated warranty on all parts and services. In addition, you'll receive free software updates with a one-time software license fee for guaranteed performance and satisfaction.
